

# Smarter Payment for Shared Facilities

Simple, secure tap-to-pay timer  
systems for facilities across  
New Zealand and Australia.

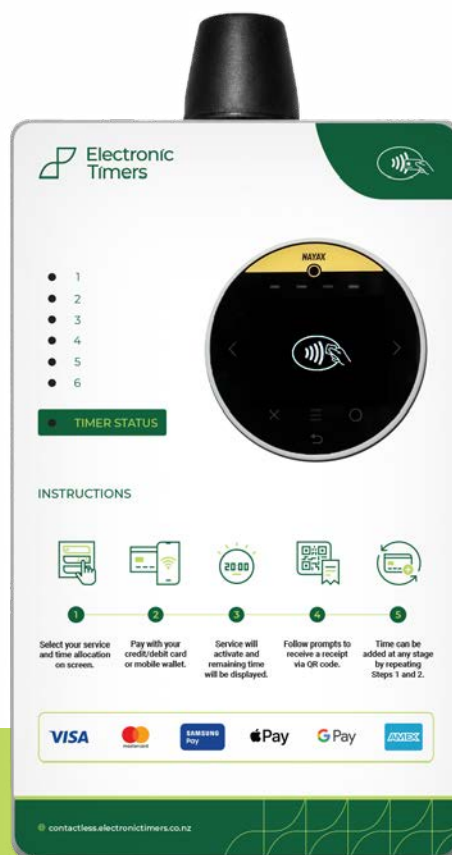

# Designed for wherever you are

Whether you're managing a remote campground, a busy marina, or a public facility that runs year-round, our units are built to handle it. Seasonal closures, sites near water, unattended locations, it's all covered.

And because everything is managed from your phone or computer, you can stay in control without ever needing to visit the site.

## Every unit includes:

- ✓ Up to 6 independent outputs per unit
- ✓ Touchscreen with built-in tap-to-pay (Visa, Mastercard, Apple Pay, Google Pay)
- ✓ Reporting via web & mobile app
- ✓ Multi-voltage - suitable for sites near water
- ✓ Remote programming and seasonal pause for closed facilities

## Transparent Pricing (NZD, excl. GST)

|                     |                                                          |
|---------------------|----------------------------------------------------------|
| One-off setup       | \$130                                                    |
| Monthly account fee | \$20/month                                               |
| Per-device fee      | \$14.70/device/month<br>(incl. licensing, support & SIM) |
| Transaction fee     | \$0.20 + 0.85% per payment                               |

*\*Electrician installation not included. Australian pricing available on request.*

# Common questions

1

## Can I replace my existing setup?

Yes - designed as a direct replacement with minimal changes.  
No more cash collection, counting, or banking runs.

---

2

## What payment methods are accepted?

Visa, Mastercard, Apple Pay, Google Pay, and Samsung Pay, the same tap-to-pay your customers already use every day.

---

3

## Does it work at remote or unattended sites?

Yes. A built-in 4G/5G SIM means no on-site internet required. Perfect for campgrounds, boat ramps, car washes, and public facilities.

---

4

## What about seasonal sites?

Simply switch off your merchant account during the off-season to pause eligible fees.

---

5

## Will it save me money?

That depends on your site, but our reporting tools give you the visibility to find out. Track usage, spot inefficiencies, and monitor consumption, all from your phone or computer.

---

6

## How do I get set up?

Get in touch and we'll recommend the right configuration for your site. From there, a registered electrician handles the installation and you're ready to go.

# Our systems are used in:
